

KIRILL PETUNIN

SENIOR FRONTEND / FULL-STACK ENGINEER / TEAM LEAD

Kazan, Russia

Worldwide, remote

📞 +79956727623 ✉ kpetunin@icloud.com 🌐 cv.holakirr.com

PROFILE

Senior engineer with 7+ years of experience building high-scale web applications. Specialises in React, TypeScript and micro-frontend architectures for fintech and e-commerce. At T1 Innotech architected a cryptocurrency platform targeting 99.9% uptime and 200% better scalability. While leading a team at Grid Dynamics, cut enterprise app load time from 10s to 2s and improved payment flows handling 1M+ daily transactions. Also founded and solo-operates a subscription SaaS with 150+ paying customers, owning architecture, payments, infrastructure and growth end to end.

WORK EXPERIENCE

MAY 2026 | VPN Subscription Service
PRESENT | **FOUNDER & ENGINEER**

Commercial VPN subscription service built and run solo — 150+ paying subscribers, in production since May 2026.

- NestJS core API (PostgreSQL, Prisma, Redis, BullMQ), a Next.js landing with web payments, a TypeScript Telegram bot.
- Recurring billing with idempotent payment webhooks and automatic retries.
- CI/CD, uptime monitoring, hourly backups and 425+ automated tests on infrastructure I run myself.

NOV 2024 | T1 Innotech
PRESENT | **SENIOR FRONTEND ENGINEER**

Cryptocurrency platform on React, Remix, TypeScript and Node.js, against a 99.9% uptime target.

- Led the migration from a monolithic frontend to BFF + micro-frontends: 200% better scalability, 20% faster deploys.
- Built real-time transaction processing with security and performance as the hard constraints.

JUN 2021 | Grid Dynamics
AUG 2024 | **SENIOR FRONTEND DEVELOPER / TEAM LEAD**

Fortune 300 client project, leading a team of 5 engineers.

- Led 5 engineers, shipped a UI component library and a large-scale dependency modernization.
- Cut enterprise app load time from 10s to 2s — lazy loading, table virtualization, render optimizations.
- Reworked payment flows for a global e-commerce brand handling 1M+ daily transactions.

SEP 2020 | Globus-IT
JUN 2021 | **FRONTEND DEVELOPER**

Banking products for major Russian financial institutions.

- Admin panel for a major bank (500+ daily users) and a mobile investment app (10K+ users), at 85%+ test coverage.

FEB 2020 | Chitai Gorod
SEP 2020 | **FRONTEND DEVELOPER**

E-commerce features for the largest Russian book retailer.

- Led analysis and delivery of a new payment method, shipped on schedule.

SEP 2018 | Rerise
FEB 2020 | **WEB DEVELOPER**

End-to-end website delivery for agency clients.

- Full lifecycle from requirements to deployment — JavaScript, SCSS/Sass, WordPress, PHP.

TECH STACK

Frontend: TypeScript, JavaScript (ES6+), React, Next.js, Remix, Ember.js, HTML5, CSS3, TailwindCSS, Styled Components

Backend: Node.js, NestJS, Express.js, GraphQL, REST API, Microservices, BullMQ

Database: PostgreSQL, Prisma, Redis, MongoDB

Tools: Git, Docker, CI/CD, GitHub Actions, Webpack, Vite, Bun

Testing: Vitest, Jest, React Testing Library, Playwright

Soft: Team Leadership, Mentoring, Code Review, Agile / Scrum

CERTIFICATION

- Apollo Graph Developer
- NestJS
- Node.js
- Node.js + Mongo + GraphQL + Express + MySQL
- React + Next.js
- GoLang
