TECH STACK

- Frontend:** TypeScript, JavaScript (ES6+), Remix, Ember.js, Next.js, React, HTML5, CSS3, TailwindCSS, Styled Components
- Backend:** Node.js, Nest.js, Express.js, REST API, GraphQL, Microservices
- Tools:** Git, Docker, Webpack, Vite, Bun, CI/CD, GitHub Actions
- Testing:** Vitest, React Testing Library, Playwright, Jest
- Soft:** Agile, Scrum, Code Review, Mentoring

CERTIFICATION

- Node.JS
- Node.JS + Mongo + GraphQL + Express + MySQL
- NestJS
- Apollo GraphQL
- React + Next.js
- GoLang

PET PROJECTS

- Snow UI
- Npm Github Storybook
- Snow UI Icons
- Npm Github Storybook

PROFILE

As a Senior Frontend Engineer with over 7 years of experience, I excel in crafting high-scale web applications that drive results. My expertise in React, TypeScript, and micro-frontend architectures has been pivotal in transforming fintech and e-commerce platforms. At T1 Innotech, I architected a cryptocurrency platform, achieving a 99.9% uptime and enhancing scalability by 200%. Leading a team at Grid Dynamics, I optimized an enterprise application, slashing load times from 10 to 2 seconds, and improved payment flows for a global e-commerce brand, supporting over 1M daily transactions. My strategic thinking and problem-solving skills consistently deliver impactful solutions, making me a top-tier product builder in the tech industry.

WORK EXPERIENCE

- NOV 2024
PRESENT

T1 Innotech
SENIOR FRONTEND ENGINEER
- Architected and engineered cryptocurrency platform using React, Remix, TypeScript and Node.js, specialized in security, performance and processing real-time transactions with 99.9% uptime target. Designed and implemented a migration from a monolithic frontend to a BFF + micro-frontend architecture, improving system scalability by 200% and reducing deployment time by 20%. Coordinated product managers and backend engineers in an Agile environment (Jira, Confluence) to refine requirements and ship features to production.
- JUN 2021
AUG 2024

Grid Dynamics
SENIOR FRONTEND DEVELOPER / TEAM LEAD
- Led a team of 5 engineers on an international project for a Fortune 300 client, deployed a modern UI component library and large-scale dependency modernization. Optimized an enterprise web application, reducing initial load time from 10 to 2 seconds through lazy loading, table data virtualization and render optimizations. Designed and implemented improvements to payment flows for a major global e-commerce brand, supporting 1M+ daily transactions and improving reliability and user experience.
- SEP 2020
JUN 2021

Globus-IT
FRONTEND DEVELOPER
- Developed an internal admin panel for a major Russian bank using React and TypeScript, supported 500+ internal users daily. Contributed to a mobile investment application for one of Russia's largest banks with 10K+ active users. Implemented extensive unit, integration and e2e tests (85%+ coverage) using Jest and React Testing Library.
- FEB 2020
SEP 2020

Chitai Gorod
FRONTEND DEVELOPER
- Contributed to a new payment method implementation and other features using JavaScript, jQuery and HTML. Spearheaded requirements analysis and implementation, guaranteed on-time delivery of critical features. Strengthened JavaScript skills through intensive hands-on work and self-driven learning.
- SEP 2018
FEB 2020

Rerise
WEB DEVELOPER
- Orchestrated end-to-end website development lifecycle for client projects, from requirements clarification with stakeholders to deployment. Leveraged JavaScript, CSS (SCSS/Sass), HTML, WordPress and PHP to deliver marketing and corporate websites.
