Senior engineer with 7+ years of experience building high-scale web applications. Specialises in React, TypeScript and micro-frontend architectures for fintech and e-commerce. At T1 Innotech architected a cryptocurrency platform targeting 99.9% uptime and 200% better scalability. While leading a team at Grid Dynamics, cut enterprise app load time from 10s to 2s and improved payment flows handling 1M+ daily transactions. Also founded and solo-operates a subscription SaaS with 150+ paying customers, owning architecture, payments, infrastructure and growth end to end.

VPN Subscription Service Founder & Engineer

Commercial VPN subscription service built and run solo — 150+ paying subscribers, in production since May 2026.

- NestJS core API (PostgreSQL, Prisma, Redis, BullMQ), a Next.js landing with web payments, a TypeScript Telegram bot.
- Recurring billing with idempotent payment webhooks and automatic retries.
- CI/CD, uptime monitoring, hourly backups and 425+ automated tests on infrastructure I run myself.

T1 Innotech Senior Frontend Engineer

Cryptocurrency platform on React, Remix, TypeScript and Node.js, against a 99.9% uptime target.

- Led the migration from a monolithic frontend to BFF + micro-frontends: 200% better scalability, 20% faster deploys.
- Built real-time transaction processing with security and performance as the hard constraints.

Grid Dynamics Senior Frontend Developer / Team Lead

Fortune 300 client project, leading a team of 5 engineers.

- Led 5 engineers, shipped a UI component library and a large-scale dependency modernization.
- Cut enterprise app load time from 10s to 2s — lazy loading, table virtualization, render optimizations.
- Reworked payment flows for a global e-commerce brand handling 1M+ daily transactions.

PET PROJECTS

Backgammon

Online backgammon — long and short — with live
matches over SSE, three tournament formats and Elo
rating. The server owns the dice and validates every move
with the rules engine the browser uses to highlight them.
